

# Lych Gate, Denzell Gardens

Local landmark restored to former splendour

**Able Joinery were recently chosen** to use their timber repairs expertise in the restoration of the Bowdon 'Lych Gate' entrance to Denzell Gardens, Devisdale, Altrincham. The gate is a period architectural local feature and Able Joinery were chosen for their experience with traditional timber restorations as well as their use of latest techniques.

Work was undertaken for the 'Friends of Denzell Gardens' under the scrutiny of Trafford Council's Greenspace and Conservation departments. It involved remaking large areas of the main tall doors which were in a sorry state as well

as recreating a period covered bench as one was completely missing. All original detailing has been matched.

Their high quality work got a special mention in Friends of Denzell Gardens and The Devisdale's spring newsletter quoting: "to have the Lych Gate repaired, so now both doors and benches are in place. Thanks to Able Joinery for their fine work"

This special project highlights the careful craftsmanship and attention to detail available for your project. As well as timber window repairs and upgrades, including sash

windows, Able Joinery offer new period style windows and doors all using the latest high insulation glass and draught sealing.

They really are the area's trusted, established experts with hundreds of satisfied local customers. Their experience and expertise costs a lot less than you might think too. ■
